👤 Nehal Ahmed

Education

Noida Institute of Engineering And Technology (Bachelor in Computer Science and Engineering) Completed July 2023, Greater Noida, Uttar Pradesh

- GPA: 7.9/10
- **Coursework:** Data Structure and Algorithm(Java), Frontend(React.js), Backend(springboot), Database(MySql)

Experience

Associate Software Engineer, Capgemini January 2024 – Present

- Maintained frontend applications using React, TypeScript, and Redux for efficient state management.
- Integrated High charts to create dynamic and interactive data visualization charts for a data acquisition system.
- Collaborated with backend teams to integrate REST APIs, ensuring seamless data flow and performance optimization.
- Built responsive UI components using Material UI and CSS modules, debugged UI/UX issues for better performance, and optimized frontend-backend API communication

Projects

Personal Portfolio Website Personal-portfolio

- A modern, responsive portfolio website to showcase my projects, skills, and achievements. Built with React.js and Tailwind CSS, featuring interactive UI, project galleries, and seamless navigation.
- The site is developed using React.js and Tailwind CSS, ensuring a clean, modern, and mobile-friendly interface. It emphasizes performance, accessibility, and smooth user experience across all devices.
- Each project section includes live demos, GitHub links, and detailed descriptions to demonstrate my hands-on experience. This allows visitors to explore my work in real-time and understand the technologies I've mastered.
- Each project section includes live demos, GitHub links, and detailed descriptions to demonstrate my hands-on experience. This allows visitors to explore my work in real-time and understand the technologies I've mastered
- The portfolio also features a contact form, resume download, and social media integration for easy networking.
- Tools Used: React.js Tailwind CSS, GSAP,Formspre

CA Services Platform CA Application

- A modern web platform designed for Chartered Accountants, offering streamlined financial management, client collaboration, and professional service showcases. Built with a robust tech stack for reliability and user-friendly experience.
- Designed and developed the front-end using React.js to create a dynamic and responsive user interface.
- Implemented the back end with Spring Boot to handle server-side logic and database interactions.
- Integrated RESTful APIs to enable seamless communication between the front-end and back-end.
- Tools Used: React.js, CSS, Bootstrap, Springboot

Technologies

Languages: Java, HTML5, CSS3, JavaScript, TypeScript, C

Technologies: React.js, Material UI, Bootstrap, GIT, Postman
